Hybrid Pro Tablet Frame Stand™ - IPHC Series

1. Align tablet upright over base. Feed tablet cord through center hole and screw into place using two (2) Allen head screws. When inserting screws, tighten BOTH by hand first. Then, fully tighten using an Allen key. Align frame upright over base and screw into place using Allen screw provided.
2. Attach the strap to the tablet upright, then attach the opposite end to the base, using the screws provided.
3. Attach the Tablet casing to the upright as shown below using the bolt and washers provided. Use the magnetic tightening tool provided to tighten the bolt.
4. Remove acrylic cover using small tamper-proof key provided. Place tablet inside and reassemble unit. If ball joint loosens on back, use the large tamper-proof key to retighten it securely.
5. Screw together the upper upright section to the lower section.
6. Slide bottom clamp over upright and screw knob into place at desired location.
7. Slide top clamp over upright and screw knob into place at desired location.
8. Open clamps and insert graphic (not shown).

Note: Clamps shown below are for the IPHC2 stand, but setup is the same for the IPHC1 stand.
