

Universal Ceiling Track Sliding Cross™ - UTC Series

1. Slide the white male assembly onto the track as shown.
2. Slide the hooks into the channel of the track.
3. Place caps onto ends of track.
4. Align the steel glides to be parallel to the ceiling track, and ensure they are securely in place (not close to falling off).
5. Slide the glides of the new cross track into the channels of the ceiling tracks.
6. Ensure cross track is stable, remove a and adjust slides as necessary.
6. Attach graphic to hooks (not shown).

UTC2 shown

Note: End cap is ornamental only and DOES NOT provide structural support.
